The Ultimate Mini Thermal Monocular Observation & Target Identification Under Adverse Conditions

The Insight Technology AN/PAS-23 MTM (Mini Thermal Monocular)

Insight Technology Inc.'s Mini Thermal Monocular (MTM) is a handheld thermal imaging device with an integrated infrared laser pointer and digital camera. The thermal imaging capability of the MTM allows for observation and target identification under adverse conditions including light rain, smoke, light snow, and low light to total darkness. Its laser pointer allows for active target designation. The digital camera enables acquisition, storage, download, and recall of viewed thermal images.

- USMC and Crane standard for hand held/pocket thermal
- Thermal Camera with picture downloading capability
- Integrated Infrared Laser for marking thermal targets
- Helmet Adapter for hands free operation
- Ergonomically designed and easy to operate
- Battle Proven
- NSN 5855-01-533-1162

ESS Profile TurboFan™ The Ultimate Weapon Against Fog

ESS
Eye Safety Systems, Inc.

The ESS Profile TurboFan™ is the preferred fan goggle of elite US Special Forces groups and the world's most effective weapon against lens fogging. This night-vision-compatible goggle features the patented TurboFan™ system, which draws fresh air into the goggle while blasting out humid air. A single AA battery powers the two-speed fan at up to 13,000 rpm for over 150 hours of silent, fog-free operation, even in extreme environments.

A push-button switch operates the robust PowerPod™ battery pack, which has a water-resistant casing for all-weather operation. An "Auto-off" timer shuts down the fan system to preserve battery life if accidentally left on, and patented technology maintains constant fan speeds as battery power diminishes. Extra-thick, 2.8mm polycarbonate lenses provide superior ballistic protection and distortion-free optics.

The ESS Profile TurboFan is available in Black or Foliage Green and weighs only 6.6oz with batteries. Contact your ADS Representative for more information about ESS Eyewear.

The Latest in Military Footwear

Introducing the S2V, ROCKY's newest addition to our military line. A world leader in rugged outdoor and occupational footwear ROCKY has been producing quality footwear for over 70 years. Rocky's original manufacturing building and headquarters in Nelsonville, Ohio goes back to 1932 and is now accompanied by a corporate office, warehouse, and distribution center.

Contact your ADS
Representative for
more information
about the S2V or
any Rocky products.

ROCKY S2V Features:

- 1,000 Denier Cordura in Sides and Panels in Treated PTFE Coat for Flame Resistance
- Aegis Microbe Shield Prevents Bacteria and Fungus Growth
- Drainage vents move water out, enhance breathability and prevent debris from entering
- Flash and water-resistant leather uppers withstand fire hazards and the rigors of sea-to-land warfare
- Made in the USA and Berry Compliant
- Proprietary high-walled Vibram soles with perforated Airport cushion footbeds and PU Midsoles
- Super Fabric instep panels prevent early boot failure from rope burn
- Super-Touch material resists cuts, abrasions, punctures, animal bites and rot
- Wicking Dri-Lex Lining and stretch Lycra tongues hug feet for secure fit
- Each boot weighs a little over 1 lb.
- Available in black, tan, and sage green. Coming soon in olive

Socks for Warriors

Darn Tough Vermont® Socks - The Ultimate in Comfort & Durability

Darn Tough Vermont® socks are designed and knit to eliminate many of the most commonly occurring foot problems faced by today's soldier. We knit with the highest quality yarns and employ stringent quality control, throughout our Northfield, Vermont based knitting mill, to create long lasting highly comfortable socks.

Designed to be light and fast, the Merino Wool Nordic Boot Cushion Sock 1420 is a ¾ height sock with superior cushioning under foot and a flat ribbed construction surrounding the leg. The heel and toe areas are reinforced for long-term durability. We use only fine gauge Merino wool which offers the ultimate in comfort and durability even after being worn multiple days without washing.

The Nordic Boot Cushion Sock works great with the Rocky 6" Alpha Force Boot and Bates M4 Recon style boots. This sock is appropriate for any customer looking for a highly versatile sock that can handle a wide range of climates and missions.

Benefits of Merino Wool:

- Merino wool is naturally anti-microbial and anti-bacterial reducing foot fungus and odor.
- Merino wool is naturally Fire Resistant/Retardant. It self extinguishes and will not melt or drip.
- Merino wool will keep you cool in the summer and warm in winter.
- Merino wool wicks moisture from your foot and dries fast.

All Darn Tough socks are available in a Berry Compliant version. Contact your ADS Representative for any questions regarding our products, capabilities or modifications to color.

Tactical Tailor Introduces A New Line of Hard Cases!

Tactical Tailor is pleased to announce its' line of injection molded hard cases. Available in black, tan, or foliage green, these cases have been designed to offer operators in the field the ability to protect their gear in just about any harsh environment. Think of them as a very inexpensive insurance policy for irreplaceable or high value items.

The Universal Hard Case Series 100 is designed to hold the PVS 14 and all its basic issued items in one case including the electronics, swing arm and helmet mount. The rugged injection molded plastic protects the entire system from shock, dust and moisture. This case can be placed on any MOLLE system via the provided MALICE clips. It even has a removable soft padded liner to facilitate cleaning.

The Universal Hard Case Series 75 is designed to fit smaller personal electronics such as an iPod, Zune or smaller GPS units. This case is available with MOLLE compatible MALICE clips or our versatile belt clip. The belt clip will allow you to attach the case to a standard size belt as well as interface with any MOLLE compatible system. The Series 75 case is lined with a soft, optical lens safe fabric that will protect the contents from scratches.

The Universal Hard Case Series 50 is a scaled down version of the series 75 case that will carry the majority of today's smaller digital cameras. This case is lined with the same soft, optical lens safe fabric as the series 75 cases.

In the near future Tactical Tailor will be introducing the Universal Hard Case Series 85 that is designed to hold any of the popular brands of ballistic eye wear on the market. This case will come lined with the same soft lens safe fabric as our other case to give the operator peace of mind when storing their valuable protective eyewear.

BENCHMADE

More Than Just A Knife - It's A Benchmade

The Benchmade 5000SBK Auto-Presidio has an automatic AXIS® opener and locking mechanism. Its Bi- directional handle grip and non reflective Mil-Spec blade finish give it aesthetics that make sense in the field. It has a MOLLE® Compatible sheath with Malice Clip- so it can go anywhere you go. It is everything you want in an automatic folder. It's more than just a knife- It's a Benchmade.

SOURCE
VAGABOND SYSTEMS

What's New In Hydration?

Source Tactical 3L! Source's exclusive "Glass-Like" lining improves taste and drastically cuts cleaning, the patented valve delivers 25% more liquid, and the leak proof Wide Pac slider offers 100% reservoir access for ice insertion and maintenance. The Tactical can be worn backpack style, dropped into a ruck, or snapped quickly to vests using Source's "Quick Attach" buckle system. Source hydration systems are fielded by USMC SYSCOM and chosen for use by the Israeli Defense Force among many other militaries. If you've ever wished there was something better in hydration, you owe it to yourself to try a "drink from the Source".

Industry leading Ballistic Protection Available through ADS!

Please contact your
ADS Representative
for all LTC armor requests.

Leading Technology Composites, Inc. is an industry leader in ballistic technology. LTC has over 200 employees and a 100,000+ sq. ft. manufacturing facility in Wichita, Kansas. LTC produces composite protection for vehicles, aircraft, structures, and personal protection. LTC Hard Armor plates are available for purchase on ADS's GSA Contract. They are a leading provider of research and development and have done extensive work on the MRAP, ESAPI, ESBI, and XSAPI.

One of the greatest assets at LTC is Dean Richardson, Director of Technology Sales and one of the nation's foremost experts in ballistic technology and testing. Dean worked at HP White Test Laboratories for 25 years. HP White is the leading facility for ballistic testing, and is one of only three NIJ (National Institute of Justice) approved independent test facilities. Testing conducted at HP White, headed up by Dean, included Ballistic Tests on hard armor, soft armor, FAT (First Article Testing), Frag tests on hard and soft armor, and ammunition testing on helmets, windows, structures, and doors. They conduct testing for a range of private companies, the US State Dept, and Department of Defense.
