- HMMWV towable and air transportable.

Model	Item Number
35WGET Shelter Support Trailer Tan	62-GET35WW8TN
35WGET Shelter Support Trailer Olive Drab	62-GET35WW8OD

NEPTUNE™

The Neptune beacon is a multi-purpose multi function signal light developed to provide the soldier and officer several ID and illumination tools in one compact package. The Neptune light produces a wide, variable-output, flashing or constant on, IR, Blue or White signal. In flashing IR mode, the intense brightness of the Neptune's signal allows it to be used as either an individual or vehicle Combat ID marker. In Blue or White signal mode, the beacon can be used as either a land or water distress signal. The Neptune high impact plastic housing and sealed electronics are engineered to withstand harsh environments and chemical exposure. Powered by one CR123A, the Neptune is lightweight, rugged, versatile and submersible to 150 feet making the beacon superbly suited for water to land deployment and special operations applications.

Despite its small size, all Neptune functions can be controlled with one hand even when gloved. The Neptune's signal is turned ON or OFF simply by rotating the battery cap. The single mode selection button allows the user to select light color and move between flashing or constant on signal mode. Brightness level can also be adjusted in constant on mode, making the light useful as either a signaling device or lamp. The Neptune can be attached to PALS webbing, belts, or uniform by using the supplied locking spring clip or wrist mounted with the included wrist strap. The light can also be used with optional head/helmet strap for use as a headlamp

- Weight: 76 Grams | 2.7 Ounce (with battery)
- Size 49mm x 27mm | 1.9" x 1.06"
- Flash Mode: Constant ON with Brightness Control | Fixed Flash
- Signal IR, White, Blue LED
- Battery One CR123A
- Coverage 360 degrees x 180 degrees
- Switching Rotate Battery Cap and Mode Switch
- Operating Life 100 Hours in Flashing signal mode | 8 Hours at maximum brightness in Constant ON signal mode
- Environmental Waterproof 16m (150 feet)
- Options Neptune Signal Light (902900)

IZLID® ULTRA COMPACT, LONG-RANGE IR LASER

The IZLID® Ultra is a compact laser offering an ultra-bright 1-Watt IR beam for target marking and flood illumination over very long distances. It is the ideal tool for signaling high-altitude aircraft and can cut through difficult night vision conditions of fog, rain and dust.

- Range > 43 km
- Powered by two 123 batteries
- Elevation and azimuth adjustments
- IR pointer/aim-dot and illuminator modes
- Compact yet powerful

Model	Item Number
IZLID® Ultra Compact, Long-Range IR Laser	434P

USMC FOR65 DEPLOYER

FOR65 Deployer is built with FPG's original 360 degree Foamtech design which utilizes 6 pound PE rigid foam construction providing padding and protection for your gear. Built to comm-air specs, you can choose to carry it like a rucksack (10 pounds empty) with its detachable heavy-duty shoulder straps or roll it around on it's unique wheel system. The body of the Deployer is bolted and secured with nylon insert lock nuts, not with rivets that can break and are not easily repaired. The FOR65 Deployer is the best "value" product available to the Marines today - Proudly Made in the USA.

- Over 6,000 cu in. capacity
- External Main Body: 1000 denier milspec Cordura
- Category: Extremely weatherproof/waterproof qualities
- Interior Main Body: Nylon Packcloth (easy to clean)
- Bottom 1050 denier milspec Ballistic Nylon and 35oz. Hypalon with two unique rubber extruded runners bolted along the length of the bottom.
- Includes two FPG Stainless Steel Wheel Housings that make the wheel system virtually indestructable.
- Mil-Spec Webbing (MIL W 17337)
- #10 YKK Zippers
- YKK W/R Zipper on side acces window
- 304 Stainless Steel Wheel Housings
- Dimensions: 30L" x 14W" x 14D"
- Colors: Black and Coyote Brown
